Sit-to-Stand lifts are designed for patients who have difficulty standing up on their own from a seated position.

Patients must be able to actively participate in the lifting process and be able to partially support their weight.

- Heavy gauge steel construction with white powder-coated finish and rubber-coated low base legs protect furniture and walls
- Spreader bar provides various hand-hold locations for the patient and accommodates various sling styles
- Large, easy to grip handles for easy maneuverability
- Intuitive foot pedal leg opening mechanism frees up hands
- Adjustable knee pad unit
- Quick-release removable foot platform for gait training
- Ergonomic hand pendant with hook
- Emergency stop button
- Warning beep and visual indicator on control box for low battery charge (24V DC motor)
- Accessory storage bag and how-to-use video included
- Designed to meet the requirements of HCPCS Code E0635

The Lumex Stand Assist is a transport assistance unit that keeps the resident actively engaged in the transport process. Transport functions of all kinds are quick, convenient, and require minimal caregiver assistance. Users grasp the middle bar and use their own strength to pull themselves up into position. A padded split seat swings out to allow loading or unloading, then swings back to form a comfortable and stable transport seat. The Stand Assist is a convenient toileting alternative to a wheelchair.

- 400 lb safe working load
- Padded dual knee pads and seat pads for comfortable transport
- Stable base with locking rear casters
- Fits easily through narrow doorways
- Affordable alternative to electric sit-to-stand lifts

*Note: The Lumex Stand Assist is designed for residents who have the strength and stability to lift and support themselves. We recommend an electric sit-to-stand lift for residents with limited strength and stability.*

### Specifications

Maximum Width .....	25"
Maximum Height .....	42.5"
Overall Length .....	33.5"
Unit Weight .....	61 lb
Front Base Height .....	5"

**LF1600** Stand Assist 1 ea

**WARNING:** Personal injury - this device is designed for transport assistance of individuals between approximately 5'1" and 6'6" (155 cm and 198 cm) in height. Ensure the LF1600 properly fits the individual being transferred before use.

The user grasps the middle bar and uses their own strength to pull themselves up into position.

Caregiver swivels seat in place and transports user from one object to another.

## 2-Point Slings

- One piece sling for use with 2-point spreader.
- Provides support from shoulders to knees.

Universal slings (also called divided leg slings) are the easiest sling to use while transferring a resident from a seated position. These can also be used for lifting from a supine position, making them suitable for most lifting situations. They are an easy-to-fit general purpose sling designed for the majority of users. They can be used for transfers from a bed to a chair, wheelchair, or toilet, chair to chair, or from the floor to a bed or chair.

Universal slings should be used for residents that are totally or partially dependent, non-weight bearing, or bariatric. Those who have limited head control should use a universal sling with head support. The large opening accommodates toileting. Mesh slings should be used for bathing. LUMEX Universal slings have four or six connection points and can be used with 2-, 4-, or 6-point spreader bars.

- Provides excellent patient comfort and security
- Reinforced back for support
- Non-mesh slings have padding on legs and back
- Height-Adjustable straps
- Easy to use
- Machine washable
- Six point connectivity is designed to enhance positioning and safety
- Designed to meet the requirements of HCPCS Code: E0621
- Six (6) month limited warranty
