Pressure Management

Superior comfort

Unsurpassed quality

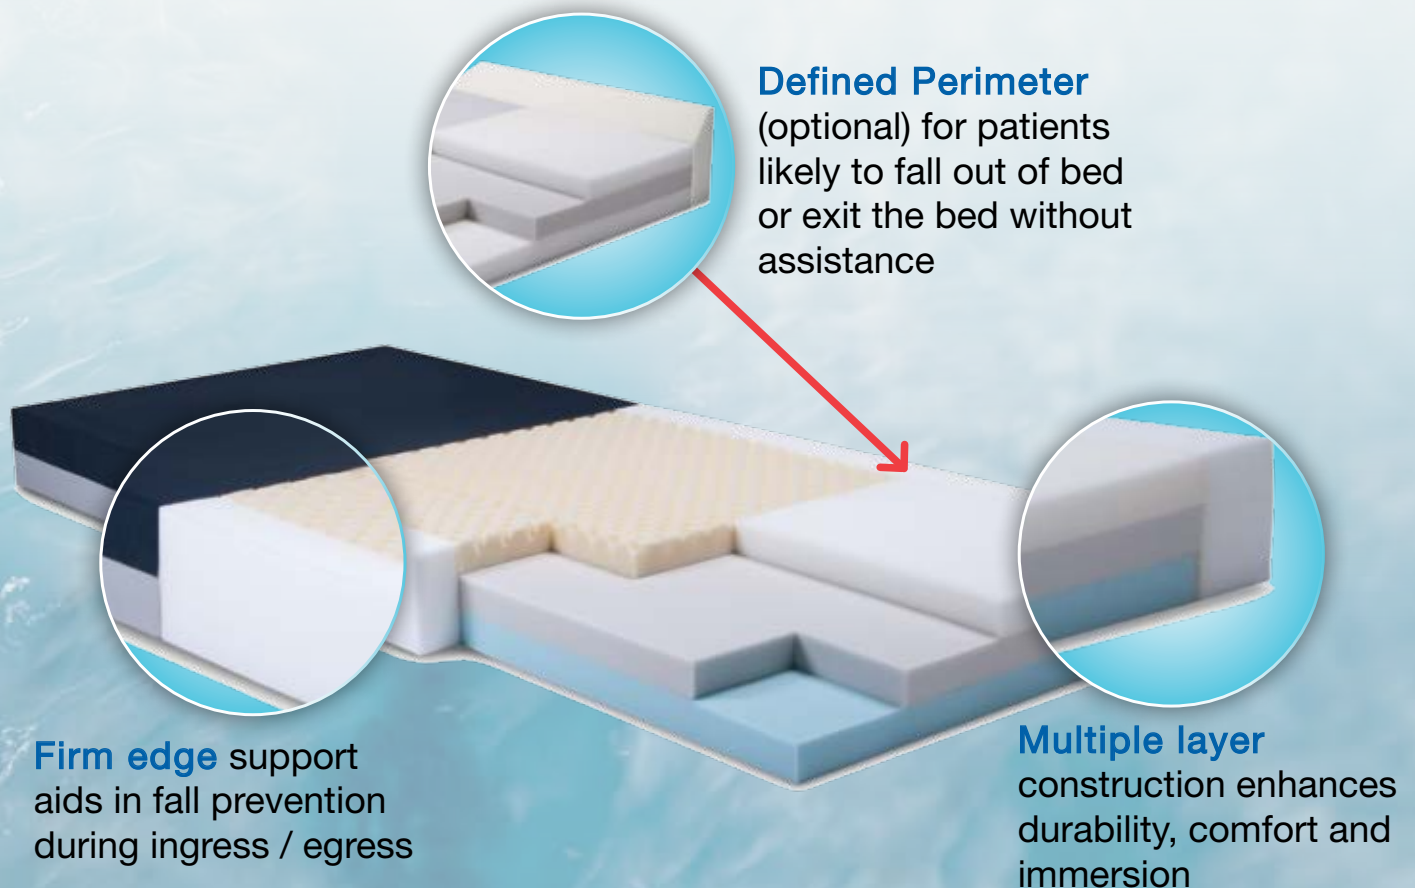

Manufactured for durability

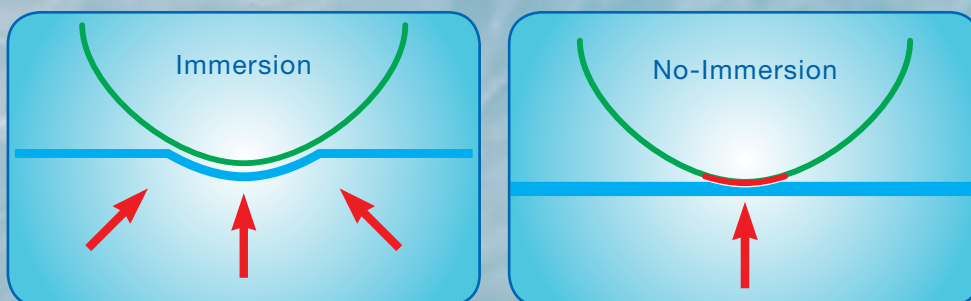

LUMEX[®]

Everest & Jennings[®]

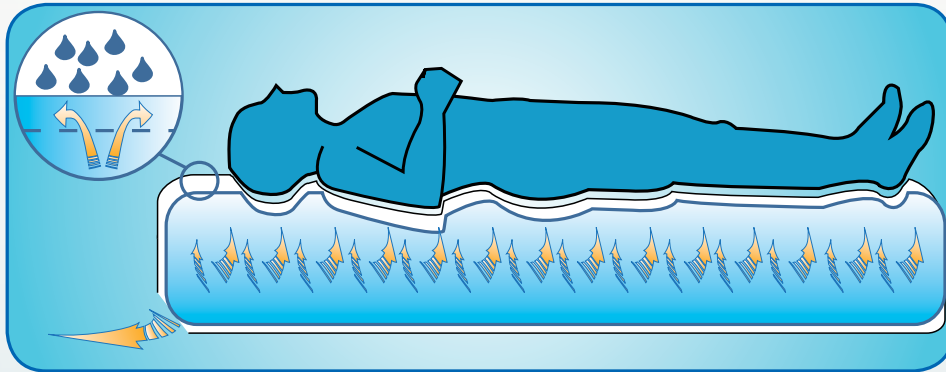

When choosing a pressure management / redistribution product there are many design features and therapy options to consider. GF Health Products, Inc. offers a complete line of support surfaces and patient positioning products utilizing the features and functions shown here as well as many other options.

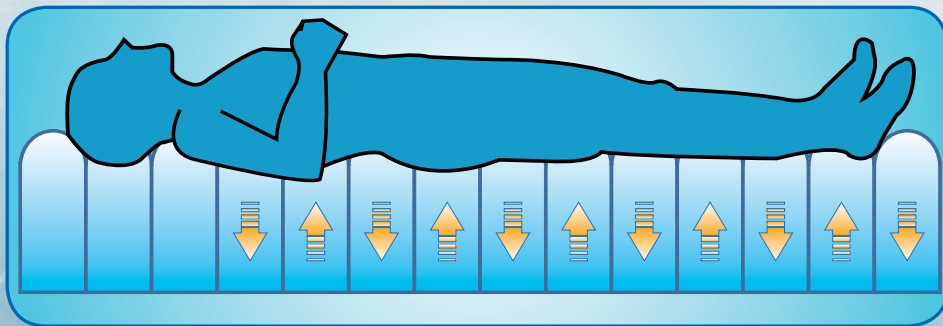

Immersion: Depth of penetration (sinking) into a support surface. Immersion is a key function to obtain optimal pressure redistribution.

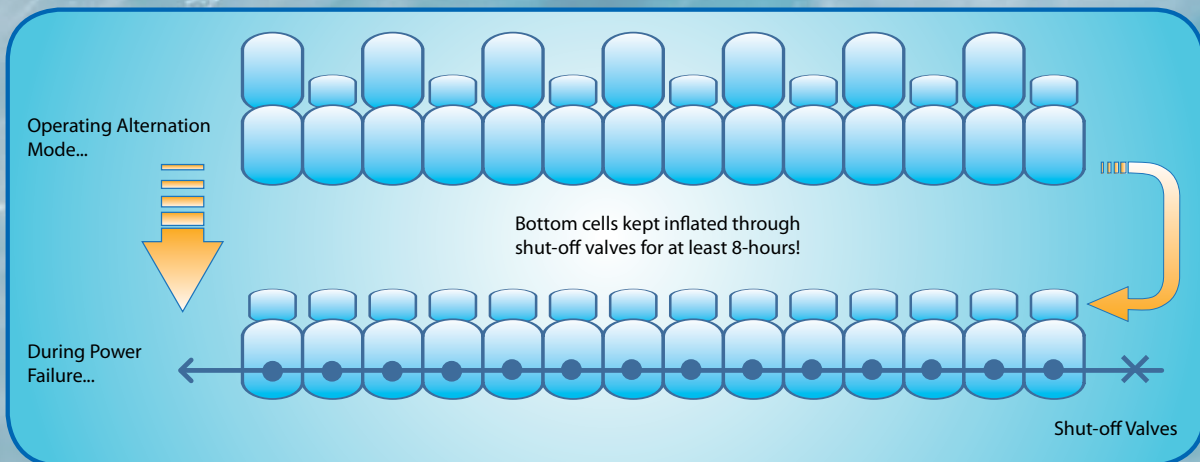

Low Air Loss: A feature of a support surface that provides a flow of air to assist in managing the heat and humidity (microclimate) of the skin.

Alternating Pressure: A feature which uses air-filled channels that alternately fill and empty to keep bearing weight off bony prominences of immobilized or weak patients who are unable to shift their weight frequently.

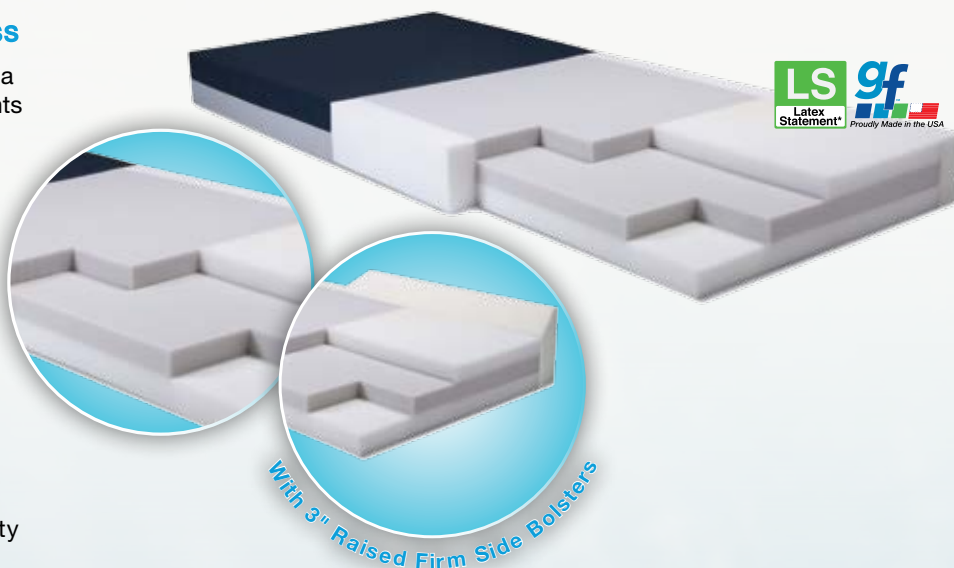

Bottom-out Prevention Technology with patented cell-on-cell technology

C300 Series Foam Mattress

The Lumex Comfort Series C300 is a perfect model for low acuity residents and users where long term comfort combined with superior durability is desired.

- “Flat-Foam” top surface provides comfort and pressure reduction
- Fluid-resistant, low friction, anti-microbial top cover with vinyl bottom cover and full zipper
- 300 lb maximum weight capacity, **EVENLY DISTRIBUTED**
- Three (3) Year Limited Warranty

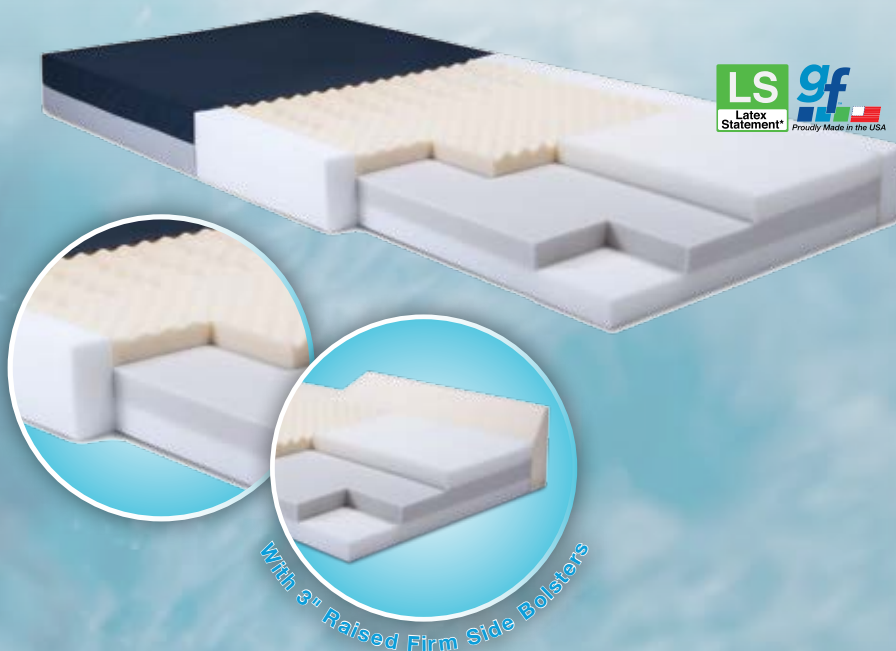

Dimensions	With Firm Side Bolsters	With 3" Raised Firm Side Bolsters

The LUMEX Select Alternating Pressure / Low Air Loss Mattress Systems are specialized mattress replacement units that utilize low air loss technology with a specialized mattress design that provides pressure management for the treatment of pressure ulcers.

The 2:1 alternating function provides active prevention for pressure relief, especially for those in acute care and long term care settings. The Lumex Select Alternating Pressure / Low Air Loss Mattress Systems offer “cell on cell therapy”, whereby the air cell is split in two where the bottom cells do not deflate if the upper cells are completely deflated in order to provide extra protection comfort for the patient in the event of a power failure and the mattress deflates.

LS200 SYSTEM FEATURES

- Alternation time is 12 minutes. In addition, the caregiver can select the “STATIC function” stopping the alternating function and providing only low air loss therapy.
- Low Pressure failures will produce an audio alarm for added safety. The alarm can be temporarily muted by pushing the pump front panel ALARM RESET button, resetting the alarm for 20 minutes.
- The foot board mounting hanger provides convenient placement on the bed.
- The soft-firm adjustment allows the patient to adjust the firmness or softness of the surface for optimal comfort with a comfort level dial.
- Quick Release CPR Valve
- Quilted Cover
- 350 lb maximum weight capacity, EVENLY DISTRIBUTED
- Size: 36" x 80" x 8"
- Model: LS200

LS300 SYSTEM FEATURES

- Alternation time can be adjusted from 10, 15 and 20 minutes. In addition, the caregiver can select the “Static Function” stopping the alternating function and providing only low air loss therapy.
- 5 Comfort Settings and Auto Firm feature.
- Low Pressure failures will produce an audio alarm for added safety.
- The foot board mounting hanger provides convenient placement on the bed.
- Quick Release CPR Valve
- Fully Zippered Quilted Cover
- 450 lb maximum weight capacity, Evenly Distributed
- Size: 36" x 80" x 8"
- Model: LS300

The LUMEX Select Convertible Mattress provides outstanding pressure displacement and redistribution to assist in the prevention and treatment of stage I through IV pressure ulcers.

LUMEX CONVERTIBLE MATTRESS FEATURES:

- Closed System (Static Air) can quickly convert to an Alternating Pressure Mattress
- Eight non-circular cylinders prevent "rolling" or "gapping"* and are fully enclosed in a fiber mesh sleeve and jacket
- Air control unit is simple, quiet and set at the optimum 10 minute cycle to eliminate guesswork for the caregiver
- 2.5" Hybrid Visco-elastic top layer does not raise body heat as with standard visco-elastic foam
- Stretch cover is fluid resistant, air-permeable (breathable) and reduces friction and patient shear
- Use of the Lumex Select Convertible will eliminate the need for: costly rental and storage of mattresses that are only used on an as needed basis, moving and transporting mattresses from room to room, overlays that are low in profile and do not provide adequate support or therapeutic benefit

Specifications

- Standard Size: 35" x 80" x 7"
- Custom sizes available including bariatric sizes (42" - 48")
- Maximum Weight Capacity 500 lb (750 lb on bariatric models) - EVENLY DISTRIBUTED
- Consult frame manufacturer regarding capacity
- Compliant with 1633, Cal TB 129, ASTM E 1590 and BFDIX-11 (Boston) fire safety regulations
- Available with 2" side-bolsters
- Five (5) year warranty on mattress

Rolled Foam Mattress

- Economical pressure-reducing and pressure redistribution mattress
- High quality foam mattress offers a high level of therapeutic comfort at an affordable price
- Ships rolled in carton to save on oversize freight charges
- Zippered, soft, flexible, breathable nylon cover moves with the patient to reduce shear and is fluid-resistant, antimicrobial, anti-static and easy to clean
- 350 lb maximum weight capacity, EVENLY DISTRIBUTED
- One (1) Year Limited Warranty
- **GF100 80" x 36" x 6" 1 ea**

Bariatric Care Foam Mattress

- Offers comfort, support, and durability for the bariatric patient
- High density foam base provides a firm, supportive foundation
- Soft foam top layer enhances patient comfort
- Super soft tapered heel section provides added pressure reduction for sensitive heel and ankle
- Top cover moves with the patient to reduce shearing
- Soft durable nylon/vinyl cover is bacteria resistant, fluid-resistant, anti static, non-allergenic, stain resistant and easy to clean.
- 600 lb maximum weight capacity, EVENLY DISTRIBUTED
- Two (2) Year Limited Warranty
- **650-1501-1633N 80" x 42" x 7" 1 ea**

Perfect for use with a Patriot LX

Gold Care Foam Mattress 419 Series

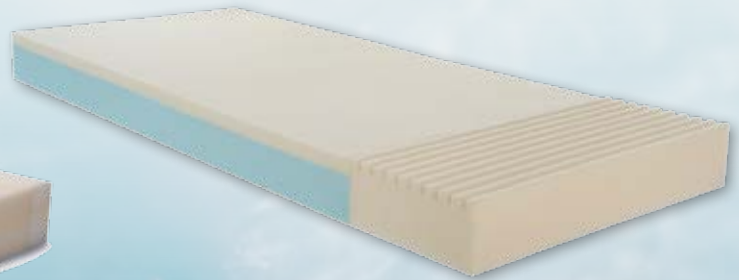

- Four separate anatomically matched support zones enhance patient comfort while reducing tissue interface pressures and providing pressure redistribution
- Antimicrobial, medical grade, 100% polyurethane foam core
- Top cover moves with the patient to reduce shearing
- Zippered cover is removable for easy cleaning
- Soft, durable nylon top cover is bacteria resistant, flame retardant, fluid-resistant, anti-fungal, anti-static, nonallergenic, stain resistant and easy to clean
- 400 lb maximum weight capacity, EVENLY DISTRIBUTED
- Five (5) Year Limited Warranty

DURA-gel™

Wheelchair Cushions

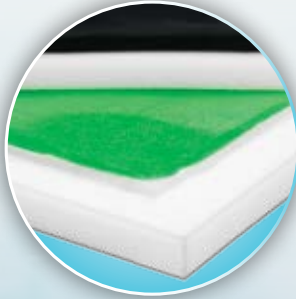

Dura-Gel™ Wheelchair Cushions, shown below, feature a specialized Dura-Gel center layer surrounded by a comfortable, high-density foam base layer in combination with a comfortable foam top layer. These cushions feature sturdy, fluid-resistant covers, accommodate a wide range of body shapes, sizes, and weights, and are conveniently lightweight at less than 5 lb for all sizes.

DURA-gel™

BASE 2G

The BASE 2G wheelchair cushion provides a durable yet comfortable solution for everyday seating needs. A layer of Dura-Gel and two densities of foam relieve pressure. Durable cover provides extra protection from moisture.

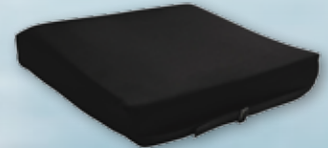

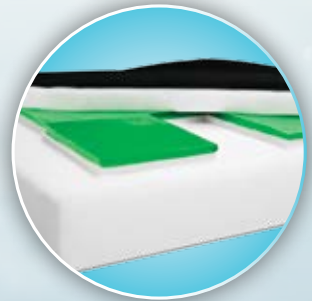

Features:

- Fluid resistant 600 denier cover
- Antimicrobial
- Flame retardant
- Removable and washable
- Product Weight: 2-3 lb
- Designed to meet HCPCS E2601

DURA-gel™

SPIII

The SPIII wheelchair cushion is a great solution for pressure reduction/redistribution. A sloped, firm base foam has Dura-Gel units under the ischial tuberosity and upper thigh. A visco-elastic foam topper and stretch cover provide more pressure redistribution than non-stretch covers and standard foam types.

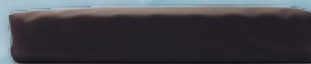

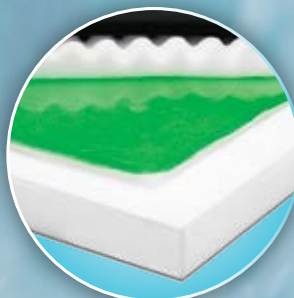

Features:

- Fluid resistant stretch top cover reduces shear/friction
- Antimicrobial
- Flame retardant
- Removable and washable
- Non-skid base
- Product Weight: 3-5 lb
- Designed to meet HCPCS E2603/E2604

DURA-gel™

BASE 3G

The BASE 3G wheelchair cushion is the best general use cushion around. Extremely lightweight due to the proprietary Dura-Gel layer. Supportive firm base foam and contouring top foam provide exceptional performance. A coated stretch fabric protects and allows for greater pressure redistribution.

Features:

- Fluid resistant stretch top cover reduces shear/friction
- Antimicrobial
- Flame retardant
- Removable and washable
- Non-skid base
- Product Weight: 2-3 lb
- Designed to meet HCPCS E2601/E2602

DURA-gel™

SPP

The SPP wheelchair cushion takes the design features of the SPIII and adds medial thigh positioning and lateral positioning. A sloped, firm foam base has Dura-Gel units under the ischial tuberosity and upper thigh. A visco-elastic foam topper and stretch cover provide more pressure redistribution than non-stretch covers and standard foam types.

Features:

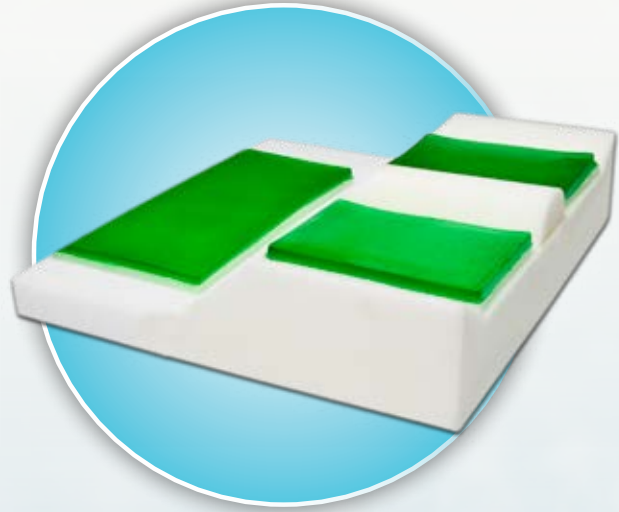

- Fluid resistant stretch top cover reduces shear/friction
- Antimicrobial
- Flame retardant
- Removable and washable
- Non-skid base
- Product Weight: 3-5 lb
- Designed to meet HCPCS E2607/E2608

DURA-gelSM

The SPP-AT wheelchair cushion provides an extra level of positioning with an anti-thrust feature. A pre-ischial ridge design positions the user's back into the seat. A visco-elastic foam topper and stretch cover provide more pressure redistribution than non-stretch covers and standard foam types.

Features:

- Non-skid base
- Strap to secure cushion firmly to the chair
- 300 lb maximum weight capacity (Evenly Distributed)
- Product Weight: 3-4 lb
- Designed to meet HCPCS E2607/ E2608

2055LS18 Adjustable Back Cushion

- Adjustable back allows for individual fit
- 2" foam back provides exceptional comfort compared to existing sling back
- 5 straps for maximizing positioning options
- Wheelchair can still be folded by removing the back cushion
- Cover is fluid resistant and easy to clean
- Works with most 18" wide wheelchairs
- Back is 18" X 17" X 2"
- Designed to meet HCPCS E2611

Lumbar Back Cushion

- Contoured lumbar support provides back support and comfort
- Improves seating posture
- High density foam

DURA-gelSM

Non-aqueous specialized visco-elastic gel core layer reduces tissue interface pressure at critical points.

- Proprietary gel is a flexible solid that will not leak
- Gel is placed at three pressure zones
- Very Lightweight
